INEOS | GRENADIER

WINDOW FILMS

Keep your Grenadier out of solar heat, UV and infrared rays for cooler driving comfort and less exposure to fading, damaging effects.

Classic

Carbon Film rejects up to 60% of infrared rays + 99% UV Protection

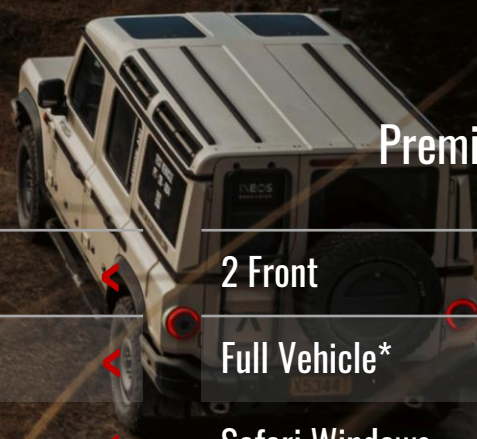

Non-reflective, true black finish that will not fade over time.

Premium Ceramic VTX

Advanced ceramic technology rejects up to 96% heat + 99% UV Protection

Metal-free film won't interfere with GPS navigation, satellite radio, cellular phones, and other electronic devices within a vehicle.

PPF WRAPPING

Self-Healing

Is one of the most advanced films on the market world wide. Popular not only for its incredible protection technology - but it's gloss level, self healing abilities and hydrophobicity.

Due to the thickness of PPF, wrapping an edge isn't always possible. Thus, it is industry standard to come in from an edge by roughly 3mm. To avoid cutting on the vehicle paint work, a pre cut template is used, and lined up evenly within a panel. Templates take into consideration the vehicles' curves and also the application process. As the PPF is optically clear, the edges are almost invisible.

PPF WRAPPING

THE FULL HALF

Self-healing clear wrap.

This level of coverage offers complete both sides protection. Designed for full extreme off-road.

\$5,990 <

PPF WRAPPING

THE HALF

Self-healing clear wrap.
This level of coverage offers half side coverage
(both sides).

\$3,300 <

PPF WRAPPING

THE GREY AREA
